

How to Plant a Tree

Roy Beckford – Ag & Natural Resources Agent
University of Florida, IFAS, Lee County Extension

How to plant a tree – First Step

- Get a small tree !!!!

Step 2 – Choose your site

Good site or bad site?

Other steps

Dig hole large enough to hold the root's full length.

Spread seedling roots outward and downward keeping root collar at grade.

Backfill and firm dirt around roots.

Water and mulch.

Mulch Out Not Up

TREE MAINTENANCE

- Soak the soil once a week unless adequate rainfall occurs
- ...but don't overwater!!

TREE MAINTENANCE

- Keep the area weed and grass free.
- Observe your tree. Keep a record of its growth and animal visitors.
- Replenish mulch often.

How roots really work

Thanks

Enjoy your pine tree
