Stephen H. Brown

Lee County Horticulture Agent

Special thanks to those who reviewed the manuscript for horticultural accuracy and presentation. Barbara Presnell, Extension Horticultural Specialist, and Michelle Bell, Extension Floriculture Specialist, Gulf Coast Research and Education Center. Master Gardeners; Rosemary Fleming, Julia Leigh, Sonja Smith, and Barbara Weems. Master Gardener Trainee; Linda Ballou and Bob Emmert, and Kip Bryant, Plantworks, Inc.

The Extension Service is part of a publicly funded statewide educational network that provides information and scientific knowledge to area residents, businesses and government leaders. The University of Florida, Extension Service offers the latest research and technology in more than 200 subjects related to horticulture, energy/conservation, agriculture, youth development and family and consumer sciences. Last year, the Lee County Extension Service provided assistance to more than 70,000 people and provided 463 classes and workshops on everything from family financial planning to pesticide training.

The Lee County Extension Service is an Equal Employment Opportunity - Affirmative Action Employer that provides research, educational information and other services without regard to race, color, sex, age, handicap or national origin.

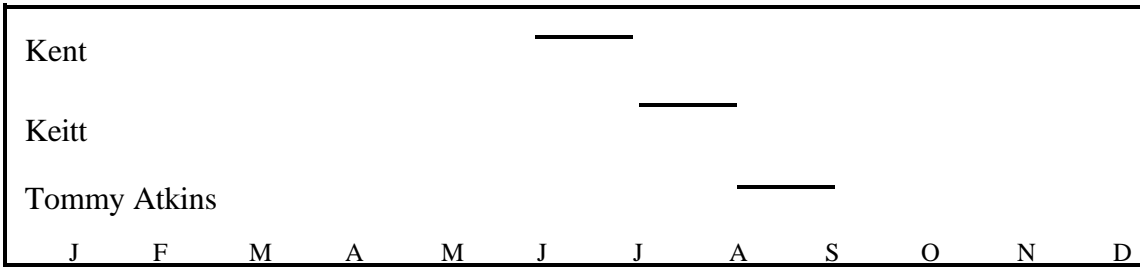

Tropical Commercial Fruit Tree Acreage in Lee County

Lee County has approximately 426 acres of commercial tropical fruit trees. Pine Island, located at the western edge of the county, accounts for 99.3 percent of the acreage. Mango production makes up most of the commercial acreage, 49 percent, or 210 acres. The leading mango varieties are *Keitt*, *Kent* and *Tommy Atkins*. Carambola is the second most planted commercial tropical fruit tree. There are 113 acres of carambola, representing 27 percent of commercial acreage. *Arkin* is the leading carambola variety. Other commercial tropical fruit crops are lychee and longan representing 67 and 24 acres, or 16 and 6 percent of production, respectively.
