

What's Blooming?

January - February

Low-Chill Peach
Prunus persica

Stephen H. Brown
Lee County Extension
Southwest Florida

Low-Chill Peach

- The University of Florida has developed high quality, low chilling, early maturing peach and nectarine cultivars that can be grown far into south Florida.
- Low chilling cultivars can grow and produce fruit under Florida's conditions that are much warmer in winter than in northern states.

Low-Chill Peach

- For low-chill peach, 100 – 150 hours of temperatures below 50°F (10°C) are required for flowering and fruit production.
- The number of hours below 50°F accumulates through the winter months and constitutes total hours of chilling.

Low-Chill Peach

Peach	Flesh Color	Type	Chilling Hours Required
Floridaglo	White	Semi-Cling	150
Floridaprince	Yellow	Semi-Cling	150
Floridabeauty	Yellow	Semi-Cling	150

Peach and orange trees growing side by side.
Fort Myers, Florida

Flowering peach tree by the swimming pool . Sanibel, Florida
